12/14/14	32	30	38
11/16/14	29	34	36
10/15/14	32	30	38

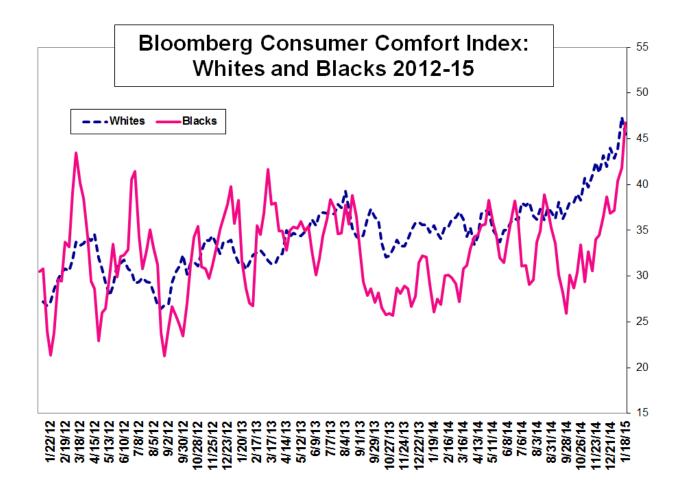

Methodology: The Bloomberg Consumer Comfort Index is produced by <u>Langer Research Associates</u>. The index is reported in a four-week rolling average; this week's results are based on a random national sample of 1,000 adults, reached by landline and cellular telephone, in the four weeks ending Jan. 18, 2015. Results of the individual CCI gauges have a 3.5-point error margin. The expectations question was asked of 500 respondents Jan. 7-18, 2015; that result has a 4.5-point error margin. Field work and tabulation by SSRS of Media, Pa.

The index is derived by averaging the positive responses to each index question. Results can range from 0 (all negative responses for all three measures) to 100 (all positive responses for all three measures). See details <u>here</u>. The survey began in December 1985.
